

Electric Drive Frac Pump

Power and Flexibility, Electrified

The Emerald™ Electric Drive Frac pump delivers up to 5,000 BHP with continuous-duty-rated drives for precise, efficient power. Compact and adaptable, it supports multiple power sources and quick rig-up with streamlined integrated controls.

Fewer delays. Faster wells. Expert-guided performance matters, no matter how your operations are fueled.

- 5,000 BHP per trailer with infinitely variable motors for superior rate balancing
- Rapid de-energization in 4–5 minutes for more efficient maintenance and mobilization
- Individual trailer-mounted pumps can be serviced quickly between stages with minimal transition time
- Compatible with highline or mobile generator power
- Simplified cabling for faster rig-up

Technical Specifications	
Horsepower	5,000 BHP
Pump Rate	18 BPM
Maximum Pressure	15,000 psi
Input Power	13.8 kW
