

EMERALD™

Electric Wireline Unit

Automation for Modern Wireline Operations

Elevate your operations with full electric wireline units, harnessing automated solutions for enhanced safety, reduced emissions, and higher efficiency during operations at lower total costs.

Energize your wireline operations with smart, reliable, applied solutions.

- Automated controls that include:
 - Adaptive Tension Control, cruise control that focus specific tension thresholds
 - Target Speed, fixed rate speed for precise winch control when needed
 - Controlhead and tooltrap functions internal to the wireline unit via touchscreen controls
 - Auto rate pumpdown that increases reaction time and job efficiency reducing overall water consumption by 5.6%
- Reduce diesel cost by more than 100 gallons per day while reducing overall emissions

Technical Specifications	
Direct Drive Drum	>800 fpm line speed @ 25,000ft >7,300 lbs line pull @ 25,000ft
Rotating Drum Base	+/- 10 degrees
Input Voltage	480 V
Maximum Power Draw	0.3 MW
