

Introducing NexTier's 100% Natural Gas Frac Pump Powered by the Caterpillar Gas Mechanical System

Experience next-level performance with the most mechanically efficient alternative-fueled frac pump technology. Powered entirely by natural gas, it delivers unmatched power density, lower emissions, and a cost-effective solution for today's frac operations.

Unlock unparalleled efficiency and sustainability in your operations

- Lower fueling expenses up to \$1.8MM per pump annually compared to diesel pumps
- Designed for longevity, utilizing the reliable Cat® G3500 Engine and TH55 transmission platforms
- Offers maximum fueling flexibility with compatibility for CNG and field gas
- Optimizes gas usage and enhances powertrain performance when paired with NexTier's Power Solutions

Technical Specifications	
Horsepower	3,600 BHP
Burn Rate	424 SCFM @ 100% Load Cat® Methane Number > 70 for maximum horsepower
Pump Rate	5" Plungers: 4.7 - 13.7 BPM 4.5" Plungers: 3.8 - 10.8 BPM
Maximum Pressure	13,038 psi 5" 15,000 psi 4.5"
